action=expandtemplates

([main](#) | **expandtemplates**)

- This module requires read rights.
- Source: MediaWiki
- License: [GPL-2.0+](#)

Expands all templates in wikitext.

- https://www.mediawiki.org/wiki/API:Parsing_wikitext#expandtemplates

Parameters:

title	Title of page. <div>Default: API</div>
text	Wikitext to convert. <div>This parameter is required.</div>
revid	Revision ID, for {{REVISIONID}} and similar variables. <div>Type: integer</div>
prop	Which pieces of information to get. <div>Note that if no values are selected, the result will contain the wikitext, but the output will be in a deprecated format.</div>
wikitext	The expanded wikitext.
categories	Any categories present in the input that are not represented in the wikitext output.
properties	Page properties defined by expanded magic words in the wikitext.
volatile	Whether the output is volatile and should not be reused elsewhere within the page.
ttl	The maximum time after which caches of the result should be invalidated.
modules	Any ResourceLoader modules that parser functions have requested be added to the output. Either <code>jsconfigvars</code> or <code>encodedjsconfigvars</code> must be requested jointly with <code>modules</code> .
jsconfigvars	Gives the JavaScript configuration variables specific to the page.
encodedjsconfigvars	Gives the JavaScript configuration variables specific to the page as a JSON string.
parsetree	The XML parse tree of the input. <div>Values (separate with <code> </code>): <code>wikitext</code>, <code>categories</code>, <code>properties</code>, <code>volatile</code>, <code>ttl</code>, <code>modules</code>, <code>jsconfigvars</code>, <code>encodedjsconfigvars</code>, <code>parsetree</code></div>
includecomments	Whether to include HTML comments in the output. <div>Type: boolean (details)</div>
generatexml	Deprecated. <div>Generate XML parse tree (replaced by <code>prop=parsetree</code>).<div>Type: boolean (details)</div></div>

Example:

Expand the wikitext {{Project:Sandbox}}.

[api.php?action=expandtemplates&text={{Project:Sandbox}}](https://codex.wordpress.org/api.php?action=expandtemplates&text={{Project:Sandbox}}) [open in sandbox]
