

[Home](#) / [Reference](#) / [Functions](#) / `add_utility_page()`

Search resources

```
add_utility_page( string $page_title, string $menu_title, string $capability,
string $menu_slug, callable $callback = "", string $icon_url = "" ): string
```

This function has been deprecated. Use [add\\_menu\\_page\(\)](#) instead.

Add a top-level menu page in the 'utility' section.

## Description

This function takes a capability which will be used to determine whether or not a page is included in the menu.

The function which is hooked in to handle the output of the page must check that the user has the required capability as well.

## Parameters

**`$page_title`**`string`required

The text to be displayed in the title tags of the page when the menu is selected.

**`$menu_title`**`string`required

The text to be used for the menu.

**`$capability`**`string`required

The capability required for this menu to be displayed to the user.

**`$menu_slug`**`string`required

The slug name to refer to this menu by (should be unique for this menu).

**`$callback`**`callable`optional

The function to be called to output the content for this page.

Default: `''`

**`$icon_url`**`string`optional

The URL to the icon to be used for this menu.

Default: ''

Return

**string** The resulting page’s hook\_suffix.
