add_comments_page(string $page_title, string $menu_title, string $capability, string $menu_slug, callable $callback = '', int $position = null): string|false

Adds a submenu page to the Comments main menu.

Description

This function takes a capability which will be used to determine whether or not a page is included in the menu.

The function which is hooked in to handle the output of the page must check that the user has the required capability as well.

Parameters

$page_title string required
The text to be displayed in the title tags of the page when the menu is selected.

$menu_title string required
The text to be used for the menu.

$capability string required
The capability required for this menu to be displayed to the user.

$menu_slug string required
The slug name to refer to this menu by (should be unique for this menu).

$callback callable optional
The function to be called to output the content for this page.

Default: `''`

$position int optional
The position in the menu order this item should appear.

Default: `null`

Return

`string|false` The resulting page's hook_suffix, or false if the user does not have the capability required.
