Search resources

bloginfo_rss(string $show = '')

Displays RSS container for the bloginfo function.

Description

You can retrieve anything that you can using the get_bloginfo() function.
Everything will be stripped of tags and characters converted, when the values are retrieved for use in the feeds.

See also

- get_bloginfo(): For the list of possible values to display.

Parameters

$show   string   optional

See get_bloginfo() for possible values.

▶ More Arguments from get_bloginfo(… $show)

Default: `''`

Source

wp-includes/feed.php

Copy

```php
function bloginfo_rss( $show = '' ) {
    /**
     * Filters the bloginfo for display in RSS feeds.
     *
     * @since 2.1.0
     *
     * @see get_bloginfo()
     *
     * @param string $rss_container RSS container for the blog information.
     * @param string $show          The type of blog information to retrieve.
     */
    echo apply_filters( 'bloginfo_rss', get_bloginfo_rss( $show ), $show );
}
```

Changelog

Version	Description
[0.71](#)	Introduced.

User Contributed Notes

Darshit Rajyaguru9 months ago   ∧ 0 ∨

Here is the example for displaying the information of blogs.

For Example,
'name': Display the blog title.
'description': Display the blog description.
'url': Display the blog URL.
'language': Display the language used on the blog.

So, Here we are display the Blog Title and Description:

<div align="right">[Copy]</div>

```
bloginfo_rss( 'name' );
bloginfo_rss( 'description' );
```

If you need to retrieve this information for use elsewhere, you can use the [get_bloginfo()](#) function with the same parameters as mentioned above.
