```
add_management_page( string $page_title, string $menu_title,
string $capability, string $menu_slug, callable $callback = '',
int $position = null ): string|false
```

Adds a submenu page to the Tools main menu.

Description

This function takes a capability which will be used to determine whether or not a page is included in the menu.

The function which is hooked in to handle the output of the page must check that the user has the required capability as well.

Parameters

$page_title string required
The text to be displayed in the title tags of the page when the menu is selected.

$menu_title string required
The text to be used for the menu.

$capability string required
The capability required for this menu to be displayed to the user.

$menu_slug string required
The slug name to refer to this menu by (should be unique for this menu).

$callback callable optional
The function to be called to output the content for this page.

Default: ''

$position int optional
The position in the menu order this item should appear.

Default: null

Return

string|false The resulting page's hook_suffix, or false if the user does not have the capability required.

More Information

Example:

```
add_management_page( 'Custom Permalinks', 'Custom Permalinks', 'manage_options', 'my-unique-identifier',
'custom_permalinks_options_page' );
```

Notes:

If you're running into the » `You do not have sufficient permissions to access this page.` « message in a ` wp_die() `
screen, then you've hooked too early. The hook you should use is ` admin_menu `.

Changelog

Version	Description
5.3.0	Added the $position parameter.
1.5.0	Introduced.

User Contributed Notes

David Brumbaugh8 years ago   ∧ 2 ∨

Example for adding a tool page :

Expand code   Copy

```
class MyWPTool {

    function __construct() {
        add_action( 'admin_menu', array( $this, 'admin_menu' ) );
    }

    function admin_menu() {
        $hook = add_management_page( 'My WP Tool Page', 'My WP Tool', 'install_plugins', 'mywpt
        add_action( "load-$hook", array( $this, 'admin_page_load' ) );
    }
```

jakubd5 years ago

0

Copy

```
// Example
add_action ('admin_menu', function () {
    add_management_page('Some page title', 'Title in the menu', 'install_plugins', 'some_unique_str
});

function my_custom_page_render_function()
{
    echo 'This is content of the page';
}
```
